Working Day ☑ If no, explain:

Diary: Dispute

Cable Suspenders   ☐

Overview of work today:
The following work was ongoing today on the Cable:
- Installation of suspender ropes into suspender brackets.
- The Cable hand-ropes were being un-spooled onto the catwalk.
- Installation of load transfer (LT) friction clamps.

I was inspecting Aaron Kent's crew on installation of suspender ropes into the suspender brackets & Tony Costa's crew on hand-rope unspooling & other misc work. See below for details & a list of labor for these crews. Others (Sami Daouk, V. Altimarano, L. Woo) were inspecting the tensioning of the bolts on the LT friction clamps, & other work. See their diaries for details on that work.

- I arrived at the pier 7 office at 06:50, & was on the bridge at 07:10.
- From 07:10 until 08:15, Aaron's crew was preparing to install (cutting catwalk holes, removing suspender bracket top plates, etc) suspender sockets at PP22S.
- From 07:10 until 11:15, Tony's crew was un-spooling the Cable hand-ropes onto the North side-span catwalk. See attached photo.
- I also intermittently checked on the installation of the OBG Lift 12 corner assembly to make sure that the Cable was not damage during installation. See attached photo.
- From 08:15 until 10:15, Aaron's crew was installing the suspender sockets into the suspender bracket at PP22S.
- From 10:15 until 12:00, Aaron's crew was preparing to install (cutting catwalk holes, removing suspender bracket top plates, etc) suspender sockets at PP20S.
- From 11:15 until 13:30, Tony's crew was organizing LT jacking brackets to get to start installing them.
- From 12:30 until 14:00, Aaron's crew was shifting the position of the downhill suspender at PP22S. The center mark shifted position during installation of the sockets into the suspender bracket.
- 13:30 until 14:30, Tony's crew was offloading material from a barge to the bridge deck.
- From 14:00 until the end of the shift, Aaron's crew was preparing to install (cutting catwalk holes, removing suspender bracket top plates, etc) suspender sockets at PPs 26S & 30S.
- From 14:30 until the end of the shift, Tony's crew was making modifications to the LT jacking brackets (chamfering rod holes, adding jacking plates, etc).
- At 17:00, the crews wrapped up their tools to end the shift.
- At 17:10, I left the bridge.
- From 17:20 until 17:40, I wrote my diary for the day, & checked email.
.
